

MULTI SCREWS

FOR A STRONG HOLD IN ALMOST ANY BASE MATERIAL

Multi Screws are a one piece Class 3 self drilling anchor. Designed to hold strong in masonry, concrete, brick, stone, thick plasterboard and plywood. T17 point to assist with embedment into material. Aggressive “teeth” for an extra strong grip. Unlike most masonry fixings, the Multi Screw can be reversed out and used multiple times.

Features & Benefits

- T17 point to assist embedment into materials.
- Aggressive “teeth” for an extra strong grip.
- Class 3 finish for internal or external use.
- 20mm embedment depth.
- #2 Square Drive.
